## Apple Root Grafts

(For varieties see list of apple trees.)

If you want a good stand of trees try our grafts wrapped with *waxed paper*.

Waxed paper excludes the air, water and dirt from the splice, allowing it to callous perfectly; does not cut the bark; prevents sprouting and keeps grafts from drying out in a dry spring.

We are running two grafting cellars, one at Topeka and one at Rossville, and are making grafts for the trade at the rate of 50,000 per day. We are in shape to take care of your order promptly.
